

Data Chefs Visualization Revision Organizer

What does the data say?

I. Data (Brief Description)

[Westworld](#) host Maeve's tribute matrix scores: positive integer values up to 20 on 20 distinct traits.

II. Data Source(s)

[Screenshot](#) from HBO's Westworld (posted on reddit).

III. Data Analysis Notes

Unclear whet

IV. Current Visualization Type(s)

Radar Chart

V. Current Visualization Problem(s)

- No order to attributes/no need for polygon, given only one host displayed
- Attribute values not easy compared

VI. Proposed Visualization Change(s) & Rationale

Change from Radar Chart to:

- Bar Chart
- Bullet Chart
- Lollipop Chart
- Table (w Conditional Formatting Shading)

All of these revisions provide an order to the attribute values—a ranking from highest to lowest—making comparisons easier. The first three also offer more familiar shapes than the original, arbitrary polygon shape.

VII. Visualization Tool(s)

Excel

VIII. Visualization Notes

N/A

IX. Final File Name(s), Locations

N/A

What does the chart say?
